

# Remote Desktop Web Access

Open your Internet Explorer browser and go to the following URL:

<https://remote.med.utoronto.ca/RDWeb>

Notes: Remote Desktop Web Access works with Internet Explorer ONLY !  
Remote Desktop Web Access functionality is limited to Windows-to- Windows connectivity. This means both computers (the computer which initiates the connection and your office computer) have to run Windows OS

On the login page, please key in the following information:

**Domain\user name:** MEDICINE\<<NetworkLogin ID>    NetworkLogin ID is your Windows userID

**Password:** This is your Windows password

For **Security** choose one of the two options available

**This is a public or shared computer** - the computer is shared (i.e. Hotel Lobby)

**This is a private computer** - the computer is your personal computer

Click on **Sign In** button

Sign in

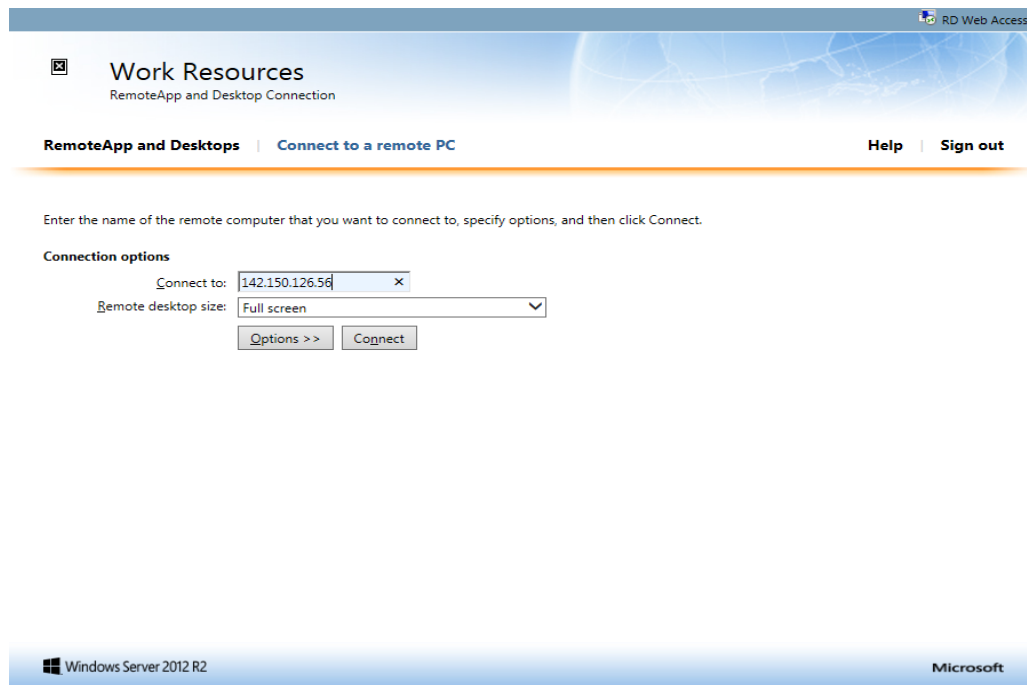

To protect against unauthorized access, your RD Web Access session will automatically time out after a period of inactivity. If your session ends, refresh your browser and sign in again.

Windows Server 2012 R2 Microsoft

On the second page click on **Connect to a remote PC** link

On the next page, in **Connect to** text box, type the IP or name of the computer you want to connect to. This is typically your desktop computer located in the office

On next step you click on **Connect**. Click **Yes** on the security warning pop-up and then you will be presented with your office computer's login screen. Login as you would on your desktop
